

TEN-TUFF® COHESIVE PACKAGES

ATTRACTIVE, DURABLE & PROTECTIVE PACKAGING MATERIALS

PolyBubble

White and black polybubble available in both cold seal and cold/heat version to form a safe and secure pocket.

Brown Corrugate

Fluted single face corrugate makes a great packaging material when stiffness and cushioning are required.

Tension WaveFlute

Create an individualized eye-catching package using our new Wave Flute for added protection and durability.

White/Brown

Add a white layer to our brown fluted inside layer and create an eye-catching package with added protection.

3D Style Corrugate

“Box style” packages created on the fly with a top and bottom and easy opening perforated strip across face.

Liner Board

Create low cost cohesive packages using our flat liner board stock with secure protection for corners.

2.5–3.0 Mil Poly

Silver/white cohesive packaging films are good solutions when tear, puncture and water resistance are necessary.

TENSION  *Ingenuity at work*
PACKAGING & AUTOMATION

Corporate: 819 East 19th Street • Kansas City, MO 64108
Manufacturing: 14330 Longs Peak Ct. • Longmont, CO 80504
Main: 816.283.1475 • Email: info@tension.com

Our cohesive materials have a special latex coating on the inside which seals only to itself when pressed together in the machine, leaving no residue on the items being packaged. You can select from a number of attractive, durable, cushioning, tear resistant and water proof cohesive packaging materials.
